SUMMARY

Fullstack Developer with 6+ years shipping fintech platforms that handle **10K+ daily transactions** across **500+ merchants**. Built systems that sustained **3x user growth without architecture rewrites**. Led a team of 3, established engineering standards (TDD, Code Review, Style Guides) that cut regression bugs by **30%**. Created a no-code forms engine that compressed product launch cycles from **weeks to hours**, directly accelerating revenue generation. Core stack: React, TypeScript, Next.js, NestJS, PostgreSQL, AWS.

EXPERIENCE

Fullstack Developer Jan 2023 – Present

Ukrpay

Leading fintech company specializing in payment solutions. Ukraine.

- Architected merchant management platform from scratch serving **500+ clients**; sustained **3x user growth** with zero architecture rewrites — saving ~3 months of refactoring effort.
- Built a JSON Schema-driven **no-code dynamic forms engine** that reduced new product launch time from **weeks to hours**, directly accelerating revenue generation.
- Led frontend team of 3 developers; established Style Guides, mandatory Code Review, and TDD culture — cutting **regression bugs by 30%** and halving onboarding time for new hires.
- Achieved and maintained **95+ Lighthouse CI scores** (Performance + SEO) via automated monitoring, image optimization, and SSR tuning.
- Configured **GitHub Actions / GitLab CI** pipelines (build → test → deploy); shipped to **AWS S3/CloudFront & Vercel** with Docker-based parity across environments.
- Managed full SDLC in Scrum: sprint planning, backlog grooming, stakeholder demos — translating product requirements into technical roadmaps.

Front-End Developer Mar 2022 – Oct 2022

Atlana

Web development company specialized in tailored web solutions for business needs, from startups to international government portals. Ukraine.

- Delivered end-to-end property listing platform with **Mapbox integration**, geolocation filters, and neighborhood-level search — enabling visual exploration across 1,000+ listings.

TECH STACK

Frontend

React 18+, TypeScript, Next.js 14+ (App Router), JavaScript (ES6+), Redux, Zustand, React Query

UI / Styling

Tailwind CSS, Material UI, Styled Components, CSS Modules

Backend / DB

NestJS, Node.js, PostgreSQL, MongoDB, REST, WebSocket

Testing

Jest, React Testing Library, Cypress, TDD

DevOps / Tools

AWS (S3, CloudFront, Lambda, EC2), Vercel, Docker, Webpack, Vite, GitHub Actions, GitLab CI, Git

DOMAIN EXPERTISE

Fintech & Payments

Merchant management platforms, payment flows, compliance-sensitive UIs, 10K+ daily transactions across 500+ merchants

Real-Time Data

WebSocket-driven trading interfaces, 1,000+ price updates/second, sub-50ms UI latency, live dashboards

Team Leadership

Leading frontend teams, code review culture, mentoring junior developers, Agile/Scrum workflows

- Implemented saved searches, property comparison, and user watchlists — increasing **session depth by 40%** and boosting return visit rate.
- Achieved **95+ Lighthouse scores** and **50% faster page loads** via Next.js SSG, structured data markup, and image optimization.

Front-End Developer

Mar 2021 – Feb 2022

Impltech

Custom software development company delivering tailor-made digital products for clients across finance, trading, and tech industries. Ukraine.

- Built real-time **trading interface** streaming live price feeds for **50+ instruments** via WebSocket with **sub-50ms UI latency** — handling 1,000+ updates/second.
- Developed interactive **candlestick charts** with multiple timeframes, technical indicators, and drawing tools — delivering professional-grade trading UX.
- Implemented full **order management system** (market, limit, stop orders) with instant execution feedback and real-time portfolio P&L tracking.

Freelance Front-End Developer

Apr 2019 – Feb 2021

Self-Employed

Freelance web development for various clients across e-commerce and service industries. Ukraine.

- Delivered **10+ responsive SPAs** using React, JavaScript (ES6+), and REST API integrations for clients across e-commerce and service industries.
- Built custom UI component libraries and implemented pixel-perfect designs from Figma/Sketch with full cross-browser compatibility.
- Managed full project lifecycle independently: client communication, estimation, development, testing, and deployment.

EDUCATION

Master of Science (MS) in Applied Mathematics

Sep 2004 –
Jun 2009

Yuriy Fedkovych Chernivtsi National University

Chernivtsi, Ukraine
