SUMMARY

Senior Front-End Developer with 6+ years of experience building fintech platforms that serve 500+ merchants and handle 3x user growth without architecture rewrites. I lead a frontend team of 3, establish code quality processes (Style Guides, Code Review, TDD), and deliver tools that cut product launch times from weeks to hours. My focus: scalable React/TypeScript architectures following SOLID principles and Design Patterns, real-time data interfaces, and measurable performance improvements (50% faster page loads, 30% fewer regression bugs). Strong leadership and stakeholder management skills — I bridge the gap between engineering and business, translating product requirements into technical roadmaps and driving cross-functional alignment in Agile teams.

EXPERIENCE

Senior Fullstack Developer / Tech Lead Jan 2023 – Present

Ukrpay

Ukraine

Leading fintech company specializing in payment solutions.

- Engineering Leadership:** Led a frontend team of 3 junior developers, managing the full Software Development Life Cycle (SDLC). Established Style Guides and Code Review processes that improved code quality and cut onboarding time for new hires. Coordinated with Product Owners in a Scrum environment.
- Architecture & Scalability:** Architected merchant management platform (500+ clients) that sustained 3x user growth without refactoring critical components or architecture rewrites.
- Strategic Optimization:** Built a custom No-code dynamic forms engine (JSON Schema), dramatically improving Developer Experience (DX) and enabling business to launch new products in hours instead of weeks of development.
- Quality Assurance:** Implemented TDD culture with Jest & React Testing Library, reducing regression bugs by 30% and maintaining 95+ Lighthouse CI Performance/SEO scores via automated monitoring.
- CI/CD & Cloud:** Configured GitHub Actions / GitLab CI pipelines automating build, test and deploy; deployed frontend apps on AWS S3/CloudFront & Vercel; used Docker to eliminate local-vs-production environment drift.

TECH STACK

Frontend

React 18+, TypeScript, Next.js 14+ (App Router), JavaScript (ES6+), Redux, Zustand, React Query

UI / Styling

Tailwind CSS, Material UI, Styled Components, CSS Modules

Backend / DB

NestJS, Node.js, PostgreSQL, MongoDB, REST, WebSocket

Testing

Jest, React Testing Library, Cypress, TDD

DevOps / Tools

AWS (S3, CloudFront, Lambda, EC2), Vercel, Docker, Webpack, Vite, GitHub Actions, GitLab CI, Git

DOMAIN EXPERTISE

Fintech & Payments

Merchant management platforms, payment flows, compliance-sensitive UIs

Real-Time Data

WebSocket-driven trading interfaces, live dashboards, high-frequency data rendering

Team Leadership

Leading frontend teams, code review culture, mentoring junior developers, Agile workflows

Front-End Developer

Mar 2022 – Oct 2022

Atlana

Ukraine

Web development company specialized in providing tailored web solutions for business needs, from startups to international government portals.

- Built an end-to-end property listing platform with interactive Mapbox map, geolocation filters, and neighborhood-level search — enabling users to explore listings visually across the city.
- Implemented saved searches, property comparison, and user watchlists — increasing session depth and return visit rate for the platform.
- Achieved 95+ Lighthouse scores and 50% faster page loads via Next.js SSG, structured data markup, and image optimization.

Front-End Developer

Mar 2021 – Feb 2022

Impltech

Ukraine

Custom software development company delivering tailor-made digital products for clients across finance, trading, and tech industries.

- Developed a real-time trading interface for a brokerage platform streaming live price feeds for 50+ instruments via WebSocket with sub-50ms UI latency.
- Built interactive candlestick charts with multiple timeframes, technical indicators, and drawing tools — delivering a professional-grade trading experience.
- Implemented a full order management system supporting market, limit, and stop orders with instant execution feedback and real-time portfolio P&L tracking.

Freelance Front-End Developer

Apr 2019 – Feb 2021

Self-Employed

Ukraine

Freelance web development for various clients across e-commerce and service industries.

- Delivered responsive web applications and SPAs using React, JavaScript (ES6+), and REST API integrations for multiple clients.
- Built custom UI component libraries and implemented pixel-perfect designs from Figma/Sketch, ensuring cross-browser compatibility.
- Managed full project lifecycle independently: client communication, estimation, development, testing, and deployment.

EDUCATION

Master of Science (MS) in Applied Mathematics

Sep 2004 – Jun 2009

Yuriy Fedkovych Chernivtsi National University

Chernivtsi, Ukraine
