SUMMARY

Fullstack Developer with 7+ years shipping fintech platforms handling **10K+ daily transactions** across **500+ merchants**. Sustained **3x user growth with zero architecture rewrites**. Led a team of 3 and established TDD / Code Review standards that cut regression bugs by **30%**. Built a no-code forms engine that compressed product launch cycles from **weeks to hours**. Stack: React, TypeScript, Next.js, NestJS, PostgreSQL, AWS.

EXPERIENCE

Fullstack Developer / Tech Lead Jan 2023 – May 2026

Ukrpay — Ukraine

Leading fintech company specializing in payment solutions.

- Architected merchant management platform from scratch serving **500+ clients**; sustained **3x user growth** with zero architecture rewrites.
- Built a JSON Schema-driven **no-code dynamic forms engine** that reduced new product launch time from **weeks to hours**.
- Led frontend team of 3; established TDD, mandatory Code Review, and Style Guides — cut **regression bugs by 30%** and halved onboarding time.
- Maintained **95+ Lighthouse CI scores** (Performance + SEO) via image optimization and SSR tuning.
- Configured **GitHub Actions / GitLab CI** pipelines; shipped to **AWS S3/CloudFront & Vercel** with Docker-based environment parity.

Front-End Developer Mar 2022 – Oct 2022

Atlana — Ukraine

Web development company building tailored solutions for startups and international portals.

- Delivered property listing platform with **Mapbox integration**, geolocation filters, and neighborhood-level search across 1,000+ listings.
- Implemented saved searches, comparison and watchlists — grew **session depth by 40%**.
- Achieved **95+ Lighthouse scores** and **50% faster page loads** via Next.js SSG and image optimization.

Front-End Developer Mar 2021 – Feb 2022

Impltech — Ukraine

Custom software for clients across finance, trading, and tech.

- Built real-time **trading interface** streaming live price feeds for **50+ instruments** via WebSocket with **sub-50ms UI latency**.
- Developed interactive **candlestick charts** with multiple timeframes, technical indicators and drawing tools.
- Implemented full **order management system** (market, limit, stop) with real-time portfolio P&L tracking.

Freelance Front-End Developer Apr 2019 – Feb 2021

Self-Employed — Ukraine

Web development for clients across e-commerce and services.

- Delivered **10+ responsive SPAs** with React, ES6+ and REST API integrations.
- Built reusable UI component libraries and pixel-perfect designs from Figma/Sketch with full cross-browser support.
- Owned full project lifecycle: client communication, estimation, development, testing and deployment.

EDUCATION

Master of Science (MS) in Applied Mathematics Sep 2004 – Jun 2009

Yuriy Fedkovych Chernivtsi National University

Chernivtsi, Ukraine
