Work status: EU work authorization (Poland) — no sponsorship required

SUMMARY

Full-Stack Engineer, 7 years — building production SaaS platforms and shipping AI-powered agentic features. Stack: React / Next.js / TypeScript · Node.js / NestJS · GraphQL · PostgreSQL · Tailwind · AWS. Designed and integrated **LLM-driven agentic workflows** (tool-calling chains, autonomous decision agents) into an existing fintech platform processing **10K+ daily transactions** across **500+ merchants**. Experienced working within and evolving **established architectures** — sustained **3x user growth with zero rewrites**.

EXPERIENCE

Ukrpay — Ukraine

Jan 2023 — Aug 2026

Leading fintech company specializing in payment solutions. Promoted from Frontend Developer to Tech Lead.

Tech Lead

Jun 2025 — Aug 2026

- Designed and shipped **AI-powered agentic features** into the existing SaaS platform: autonomous fraud-screening agent, LLM-driven merchant support assistant with tool-calling chains (OpenAI API, LangChain, Node.js).
- Led frontend team of 3; established TDD, mandatory Code Review, and Style Guides — cut **regression bugs by 30%** and halved onboarding time.
- Owned technical architecture decisions across the platform: API design (REST + **GraphQL**), service boundaries, and data model reviews for new products.
- Mentored developers through pairing and structured feedback; translated business requirements into technical roadmaps.

Frontend Developer

Jan 2023 — May 2025

- Architected merchant management platform from scratch (**Next.js, NestJS, PostgreSQL, Tailwind**) serving **500+ clients**; sustained **3x user growth** within existing architecture.
- Built **JSON Schema-driven no-code forms engine** (30+ field types, conditional logic, virtualized rendering) — compressed product launches from **weeks to hours**.
- Designed **Node.js / NestJS APIs** (REST + **GraphQL**) and the **PostgreSQL** data layer processing **10K+ daily transactions**; optimized queries and indexing under growing load.
- Deployed to **AWS (S3, CloudFront, EC2)** with **GitHub Actions / GitLab CI** pipelines and Docker-based environment parity.

Front-End Developer

Mar 2022 — Oct 2022

Atlana — Ukraine

Web development company building tailored solutions for startups and international portals.

- Delivered property listing platform with **Mapbox integration**, geolocation filters, and neighborhood-level search across 1,000+ listings.
- Implemented saved searches, comparison and watchlists — grew **session depth by 40%**.
- Achieved **95+ Lighthouse scores** and **50% faster page loads** via Next.js SSG and image optimization.

Front-End Developer

Mar 2021 — Feb 2022

Impltech — Ukraine

Custom software for clients across finance, trading, and tech.

- Built real-time **trading interface** streaming **50+ instruments** via WebSocket — **1,000+ price updates/sec** at peak with **sub-50ms UI latency** (auto-reconnection, data buffering).
- Developed interactive **candlestick charts** with multiple timeframes, technical indicators and drawing tools.
- Implemented full **order management system** (market, limit, stop) with real-time portfolio P&L tracking.

Freelance Front-End Developer

Apr 2019 — Feb 2021

Self-Employed — Ukraine

- Delivered **10+ responsive SPAs** with React and REST API integrations; built reusable UI component libraries from Figma/Sketch designs.
- Owned full project lifecycle: client communication, estimation, development, testing and deployment.

EDUCATION

Master of Science (MS) in Applied Mathematics

Sep 2004 — Jun 2009

Yuriy Fedkovych Chernivtsi National University

Chernivtsi, Ukraine

LANGUAGES

Ukrainian	Russian	English	Polish
Native	Native	Upper-Intermediate (B2)	Upper-Intermediate (B2)
●●●●●	●●●●●	●●●●●	●●●●●

CORE SKILLS

AI & Agentic

OpenAI API, LangChain, tool-calling agents, RAG pipelines, prompt engineering, structured output

Frontend

React, TypeScript, Next.js, Tailwind, GraphQL, Redux, React Query

Backend

Node.js, NestJS, PostgreSQL, GraphQL, REST, WebSocket

Cloud & DevOps

AWS (S3, CloudFront, EC2, Lambda), Docker, GitHub Actions, CI/CD

Testing

Jest, React Testing Library, Cypress, TDD

Working knowledge

Python, FastAPI, Go, Drizzle ORM, TypeORM

DOMAIN EXPERTISE

AI & Agentic Systems

Production LLM agents with tool calling, RAG, autonomous workflows in existing SaaS architectures.

Fintech & Payments

Merchant platforms, payment flows, 10K+ daily transactions across 500+ merchants.

Real-Time Data

WebSocket trading UIs, 1,000+ updates/sec, sub-50ms latency.

OPEN SOURCE & PET PROJECTS

JSONtoJSX

AI-agent-driven tool: LLM parses JSON schema → autonomous React component generation + live preview + production TSX codegen. 174 automated tests.
jsonjsx-web.vercel.app

CareConnect

Two-sided care marketplace: Elasticsearch geo-search, booking lifecycle, Stripe payouts.

SOFT SKILLS

Team Leadership · Code Review Culture · Mentoring · Agile / Scrum · Stakeholder Management
