TECHNICAL SKILLS

- Frontend Core**
HTML5, CSS3, Sass, JavaScript, TypeScript
- Frameworks & Libraries**
React.js, Next.js, React Native, Angular, Vue.js
- UI Libraries**
Tailwind CSS, Material UI, Styled Components
- State Management**
Redux, MobX, Zustand

PROFILE

Senior Front-End Developer with 6+ years of expertise building high-performance fintech and enterprise web applications. Specialized in architecting scalable React/TypeScript solutions for real-time trading platforms, banking systems, and complex administrative dashboards. Proven track record of delivering end-to-end projects from architecture design to production deployment, including a complete dynamic forms system that eliminated developer dependency for business users. Expert in WebSocket implementations for low-latency data streaming, performance optimization, and building reusable component architectures. Strong technical leadership with experience in mentoring developers, conducting code reviews, and establishing frontend best practices across teams.

PROFESSIONAL EXPERIENCE

Ukrpay 01.2023 - Present
Senior Front-End Developer

OshchadPAY Online Merchant Dashboard
Tech Stack: React, TypeScript, Redux, Material UI, REST API

- Architected and developed a comprehensive merchant management platform handling real-time transaction monitoring for 500+ active merchants
- Implemented advanced filtering, sorting, and pagination systems to efficiently handle large datasets (10K+ transactions daily)
- Built modular terminal and cashier management system with role-based access control (RBAC)
- Created reusable component library reducing development time for new features by 40%
- Optimized bundle size and implemented code-splitting, improving initial load time by 35%

Key Achievement: Designed dashboard architecture that scaled seamlessly as merchant base grew 3x during tenure

Credit Factory Administrative Platform
Tech Stack: React, TypeScript, Zustand, REST API, Express

- Developed full-stack administrative system for loan application management with complex workflow orchestration
- Implemented dynamic reporting module with customizable filters and export functionality (Excel/PDF)
- Built integration layer for multiple external systems (credit bureaus, payment gateways) with error handling and retry mechanisms
- Designed role-permission management system supporting granular access control
- Built high-frequency trading interface streaming live market data for 50+ stock symbols simultaneously
- Implemented WebSocket connection with automatic reconnection logic and data buffering during network interruptions
- Developed low-latency bid/ask price calculation engine updating UI in <100ms
- Created real-time order book visualization with optimized re-rendering strategy (React.memo, useMemo)
- Built advanced charting system with technical indicators (RSI, MACD, Moving Averages)
- Implemented order placement system with instant visual feedback and error handling
- Mentoring:** Conducted code reviews and mentored 2 junior developers on WebSocket best practices and React performance optimization

Key Achievement: Achieved <50ms UI update latency during peak trading hours handling 1000+ price updates per second

Freelance 09.2020 - 03.2021
Front-End Developer

- Delivered 5+ client projects ranging from landing pages to complex web applications
- Specialized in React-based solutions with focus on responsive design and performance
- Established reusable project templates and development workflows reducing project kickoff time by 30%

Backend
Node.js, Express, NestJS, GraphQL

Database
SQL, NoSQL, MongoDB, PostgreSQL

Tools & Practices
Git, GitHub, Unit Testing, REST API

Other Languages
Python, Java, C#

LANGUAGES	
Ukrainian	Native
Russian	Native
English	Professional
Polish	Intermediate
French	Basic

EDUCATION

2006 - 2009
Yuriy Fedkovych Chernivtsi National University
Mathematician-Programmer

2004 - 2006
Kamianets-Podilskyi National Ivan Ohienko University
Mathematician-Programmer

2019 - Present
freeCodeCamp.org
Continuous Learning

Key Achievement: Reduced manual data entry by 60% through automated reference data synchronization

Dynamic Forms System for Banking
Tech Stack: React, TypeScript, Custom Form Engine, JSON Schema

- Full-cycle project ownership:** Led architecture design, implementation, and production deployment
- Engineered a no-code form builder enabling business users to create complex multi-step questionnaires with conditional logic, validation rules, and dynamic field dependencies
- Designed JSON-based form schema system with real-time preview and version control
- Implemented drag-and-drop interface with 30+ field types (text, select, file upload, signature, etc.)
- Built form analytics dashboard tracking completion rates and drop-off points
- Optimized rendering performance for forms with 100+ fields using React virtualization

Key Achievement: Eliminated 100% of developer involvement in form creation, reducing time-to-market for new products from weeks to hours

Atlana 03.2022 - 10.2022
Front-End Developer

Real Estate Listing Platform
Tech Stack: React, TypeScript, Next.js, Tailwind CSS, REST API

- Developed property search platform with advanced filtering (location, price range, amenities, square footage)
- Implemented map-based property browsing using Mapbox with clustering for high-density areas
- Built responsive image galleries with lazy loading and optimized image delivery (WebP format)
- Created SEO-optimized listing pages using Next.js SSG/ISR for improved search rankings
- Implemented favorite listings and comparison features with local storage persistence
- Optimized performance achieving 95+ Lighthouse scores across all metrics

Key Achievement: Reduced page load time by 50% through image optimization and code-splitting strategies

Impltech 03.2021 - 02.2022
Front-End Developer

Real-Time Stock Brokerage Trading Interface
Tech Stack: React, TypeScript, WebSocket, Redux, Custom Charting Library
